

Deploy. Monitor. Enforce.

For organizations looking to simplify and streamline the deployment, monitoring, and enforcement of SharePoint Governance policies, AvePoint's DocAve Software Platform helps organizations to:

- Increase business productivity by delivering high-performance global collaboration
- Increase operational efficiency and reduce total cost of ownership (TCO).
- Provide information technology (IT) assurance by improving quality of service and minimizing business disruption.
- Enable security and compliance for business content by helping to standardize and enforce corporate IT policies.

SharePoint Governance Solution Brief

Learn how organizations worldwide are using AvePoint's DocAve Software Platform to deploy, monitor, and enforce Microsoft SharePoint 2010 governance policies.

Business Needs

Microsoft SharePoint is the platform of choice for organizations to store and manage enterprise content. To support SharePoint's growth and ensure the success of SharePoint initiatives, comprehensive governance policies to control how organizations' business divisions and IT teams cooperate are critical. Governance plans outline the policies, roles, responsibilities, and processes that help make SharePoint initiatives successful, and ultimately increase SharePoint's return on investment (ROI).

Challenges

As deployments expand, SharePoint's distributed architecture and propensity for grass-roots growth make effective governance and management a daunting, resource-intensive challenge. To overcome SharePoint management challenges and optimize SharePoint ROI, organizations must find ways to:

- Quickly deploy IT governance policies across all SharePoint assets
- Monitor governance policy compliance and SharePoint usage to proactively manage SharePoint content and users
- Ensure global users are provided with a high quality of service
- Reduce management costs and SharePoint TCO with improved operational efficiency and resource allocation
- Seamlessly manage multiple SharePoint environments
- Mitigate risks of non-compliance with corporate or industry policies

DocAve Difference

The DocAve Software Platform simplifies the deployment, monitoring, and enforcement of SharePoint governance policies while enabling centralized or delegated management of SharePoint farms. Organizations can manage development, test, and production farms with ease, as well as govern solution and component deployment with DocAve's application lifecycle management tools.

Key Benefits of the DocAve Software Platform

Increasing Business Productivity

DocAve 6 helps organizations increase business productivity by delivering high-performance, global collaboration. DocAve helps organizations synchronize relevant content across geographies and consolidate enterprise-wide content access to SharePoint by migrating or integrating existing content from legacy systems in order to:

- Enable seamless global SharePoint service
- Optimize content availability
- Provide a high quality of service for end users

With DocAve, all global users will be able to seamlessly collaborate without hindrance from network limitations or content availability.

Improving Operational Efficiency and Reducing TCO

With DocAve's powerful reporting, batch deployment, scheduling, and security-trimmed capabilities, organizations are able to:

- Simplify and automate administrative procedures
- Delegate management tasks to business users
- Provide organizations with critical insight necessary to make better management decisions

With DocAve's ability to quickly consolidate legacy platforms onto SharePoint, organizations can realize instant cost reductions for IT infrastructure and licensing. Organizations

can also rest assured that critical SharePoint assets will remain fully protected and managed while storage costs are optimized because DocAve integrates with and supports leading hardware and SharePoint software solutions.

Enhancing IT Assurance

As SharePoint's usage expands within organizations and daily productivity becomes increasingly critical, the ability for IT to meet stringent service level agreements (SLAs) is essential. By delivering highly available service; comprehensively protecting critical business data; simplifying the provisioning, restructuring, and replicating of SharePoint's site architecture; and extending SharePoint's storage architecture, DocAve helps organizations:

- Comply with the most stringent SharePoint SLAs
- Optimize performance to improve quality of service
- Scale server, site, and storage architectures to support any sized user base
- Support long-term content and information management requirements

Supporting Security and Compliance Initiatives

To support corporate or government regulatory requirements, DocAve provides organizations with the tools necessary to easily deploy, enforce, and monitor compliance with corporate policies. With comprehensive auditing and reporting, DocAve helps organizations:

- Quickly identify problem areas
- Track usage activity
- Produce actionable reports to enforce policies

With DocAve's unmatched ability to automate policy management, organizations can operate with confidence.

DocAve Solutions for SharePoint Governance

The DocAve Software Platform offers a fully integrated toolset for SharePoint governance, with robust features for SharePoint migration, integration, management, optimization, protection, and reporting.

About AvePoint

AvePoint is a global technology company and proven software leader.
